## Kyocera SGS Precision Tools: Risk Assessment – Coronavirus and Supply Constraints

To our customers:

Kyocera SGS Precision Tool is not experiencing any disruption in our supply chain related to the coronavirus at this time. Our tungsten carbide comes from multiple suppliers in the U.S. which helps to minimize any disruption.

KSPT manufactures all finished products in the USA and UK. We carry a robust safety stock level of carbide blanks and are committed to large stocking levels of finished tools.

KSPT organizational objective is to maintain at least a 95% order fill rate and currently holds a 97% order fill rate on category A, B, and C items (prime movers). Additionally, transportation of our finished products has not been impacted at this time.

Kyocera SGS Precision Tools is continuing to monitor this developing situation to limit any disruption to business. Measures have been put in place to provide a safe and healthy environment in our workplace for all associates, customers, and vendors. Visits to our facilities will be limited to essential services and people will complete a self-assessment prior to entering our workplace. We are following the guidelines of the CDC and have implemented additional cleaning and sanitation of our workplace. Associates have been instructed to take precautionary health measures including hand washing, social distancing and staying home when sick.

Updates will be provided on an as needed basis.
